

# Headaches

A common cause of headaches is from spinal bones in the neck that aren't supporting the head properly. You might not notice your reduced ability to turn your head. But these subluxations affect nerves, muscles and even the blood supply to your head.

When you chose chiropractic you are choosing to help your body the way God intended.....Naturally... There are several types of pain relieves out there that numb the bodies ability to feel pain...These pain relieves also come with risk and side effects. With Chiropractic there are no side effects .

If you are suffering from headaches and have tried everything...Call us TODAY to schedule your FREE consultation...
